S03 Project Generation

Key Concepts from the last Session

Group discussion

Key Concepts from the last Session

Project Generation

Objectives

- Grasp the origins of project initiation.
- Comprehend the project generation process.
- Define what constitutes a strategically aligned project.
- Discuss the importance of generating projects that resonate with the company's vision and market needs.
- Align ideas with strategic objectives.
- Explore tools and methodologies for effective project generation.

Project Selection

Contents

- 1.1 Project generation
- 1.2 Introduction to Project selection
- 1.3 The project assessment process
- 1.4 Project selection methods

Project Selection

1.1 Project generation

The Importance of Strategic Project Generation

Aligning Projects with Business Objectives

Consider Company X, a leader in renewable energy. They transformed the industry by aligning their project initiatives with sustainable innovation goals.

How can strategic project generation foster similar success in any sector?

The Importance of Strategic Project Generation

Aligning Projects with Business Objectives

How can strategic project generation foster similar success in any sector?

1. **Clear Strategic Alignment:** Projects should be selected based on their potential to advance key business objectives.
2. **Innovation Integration:** By focusing on innovative solutions that address specific industry challenges, companies can set themselves apart from competitors.
3. **Stakeholder Engagement:** Engaging key stakeholders in the project generation phase ensures that projects have the support they need from all relevant parties. successful implementation.
4. **Resource Optimization:** Strategic project generation requires the efficient allocation of resources.
5. **Continuous Evaluation:** Implementing a robust framework for monitoring and evaluating the progress and impact of projects ensures that they remain aligned with strategic objectives over time.

How do projects come about?

How do projects come about?

What do businesses want?

How do projects come about?

How do projects come about?

What do businesses want?

- Increase sales
- Operating more efficiently
- Saving time or money
- Increase quality
- Increase profit
- Sustainable Growth
- Social awareness

BUSINESS NEEDS AND DEMANDS

Project Generators

- Business Needs or Strategic Opportunities
 - Improving efficiency, reducing costs ...
- Market Demand
 - Changes in economy, in supply and demand cycles ...
- Customer Request
 - Specific software, custom made products ...
- Legal Requirement
 - Product labelling, CO2 emissions ...
- Technological Advance
 - Creating new needs ...
- Social Need
 - Public awareness campaigns, ecological needs ...

Project Generators

P	E	S	T	E	L
Political	Economic	Social	Technological	Environmental	Legal
It represents the government policies (of each country where the company is located, its subsidiaries or where the projects are going to be carried out) at the local, regional, national and international level that directly affect the company or enterprise. Government policy	In this aspect, macro factors of the economy are observed according to the country where our business is located and where the projects want to be carried out. Factors such as GDP, interest rates, unemployment, exchange rates, accessibility to resources, level of economic development, inflation, etc., which can directly affect the execution of company plans, strategies and campaigns.	Factors in terms of culture, educational level, religion, beliefs, consumption habits, etc., that can add value to projects or affect them. It is important to consider the social trends that directly affect the business strategy. Objective: to determine the market sensibility to the proposed project outcomes	The factors in this section are those that are closely associated with the evolution of technology. The speed with which the development and advancement of technology in the modern world makes the company, enterprise or project quickly fall into obsolescence or the digital divide. Another aspect to take into consideration is the technological transfer that goes hand in hand with the continuous learning that must be had for the installation, use and application of the technology.	These factors are closely linked to the conservation of the environment. The decline of raw materials Pollution and green house gas emissions Promoting positive business ethics and sustainability	These factors are directly related to the legislation of the country where the company is located or where it will carry out its projects. Objective: establish organisational and legal requirements and possible constraints Determine organisational structure, personnel qualifications and skills Determine administrative requirements (specialized software)

Objectives

SMART STRATEGIC OBJECTIVES

Specific	Measurable	Achievable	Relevant	Time-bound
S	M	A	R	T
•What do I want to accomplish? •Why is this goal important? •Who is involved? •Where is it located? •Which resources or limits are involved?	•How much? •How many? •How will I know when it is accomplished?	•How can I accomplish this goal? •How realistic is the goal, based on other constraints, such as financial factors?	•Does this seem worthwhile? •Is this the right time? •Does this match our other efforts/needs? •Is it applicable in the current socio-economic environment?	•When? •What can I do six months from now? •What can I do six weeks from now? •What can I do today?

SMART Objective Example:

- Increase the sales of product line A in Latam by 10% year-on-year for 3 years.
- Reduce our carbon footprint by 5% in the period 2021-2023.

Project Generators

**Determining the need, demand or strategic consideration
that is driving the project
will help you define the project goals
and understand how it fits with the company's strategic plans**

Examples:
hotel, shop, Olympic venue – time is key

Objectives

ORGANISATION

PROJECTS

ALIGN

Project Selection

1.2 Introduction to project selection

Introduction to Project Selection

Introduction to Project Selection

- Organizations want to choose projects with the greatest potential for revenue (both profit and non-profit organisations)
- Many organisations do not have a formal selection process but a senior executive says “Do it”
- More success when projects have been selected through a selection process after reviewing project concepts documents
- Selection criteria methods include qualitative (scoring models) and quantitative (financial reviews)

Project Selection Process

- Information gathering and analysis that enables to judge both qualitatively and quantitatively the advantages and disadvantages of allocating resources to one particular initiative or project

Project Selection Process

Project Selection

1.3 The project assessment process

Project Assessment Process

- Process by which different projects are assessed and evaluated
- Objective: selection of projects to carry out

1. **Pre-assessment:** high level assessment of project concepts
2. **Assessment:** more detailed studies

Pre – Assessment & Assessment

1. Pre-Assessment

2. Assessment

Triple Restriction

1. Pre - Assessment

- Initial high level assessment of project ideas

- Identification of business needs

- Identification of ideas, alternatives and concepts

- High level evaluation

- a) Profile assessment

- b) Feasibility

☐ yes
☐ no
☐ maybe

1. Pre - Assessment

a) Profile assessment

- Based on common sense and experience
- High level estimations on income and costs
- Includes the “no project” assessment

b) Feasibility

- Based on secondary sources of information to establish other variables (market, investment capacity)
- Objective: establish whether to do more detailed studies

1. Pre - Assessment

Project Pre - Assessment: *(Project Idea name)*

Profile Pre-Assessment:

(Based on common sense and experience, They are a high level estimations on income and costs)

Approved
Idea:
(YES/NO)

Feasibility:

(Based on secondary sources of information to establish other variables, as: market, investment capacity, financial resources, etc. More detailed.)

Justification:
(a brief explanation of the result)

Wrap Up

- **Project Origin:** Understanding the genesis of projects within the strategic framework of a business.
- **Project Generation:** Exploring the creative processes that lead to viable project ideas.
- **Pre-Assessment Method:** Employing systematic techniques to evaluate the potential of project ideas in the early stages.
- **Strategic Alignment:** Ensuring all project ideas align with the organization's mission, vision, and strategic goals.
- **SMART Objectives:** Setting clear, measurable, achievable, relevant, and time-bound objectives as a compass for project success.
